

REMARKS

By the above actions, the specification and claim 12 has been amended and a new sheet of drawings containing new Figs. 16 & 17 presented. In view of these actions, all outstanding formal matters have been addressed.

In particular, with regard to the drawing objection, the new figures illustrate embodiments possessing the multiple manners of movement encompassed by claim 12 without raising issues of new matter, being consistent with the individual manners of movement where originally disclosed. In view of the addition of these new figures, the specification has been amended to make reference to them. As for the Examiner's comment relative to Fig. 6, it appears to directed to the version of Fig. 6 found in the WIPO publication of the PCT application upon which this application is based and not upon the set of drawings filed by the undersigned on August 21, 2006, together with the substitute specification. A copy of these drawings are appended hereto and now labeled as Replacement Sheets. Accordingly, the objection to the drawings should now be withdrawn.

Lastly, with regard to the objections to claim 12, claim 12 has been amended in conformance with the Examiner's interpretations of the objected to language that was set forth in his objection.

Therefore, this application should now be in condition for allowance and action to that effect is requested. However, while it is believed that this application should now be in condition for allowance, in the event that any issues should remain, or any new issues arise, after consideration of this response which could be addressed through discussions with the undersigned, then the Examiner is requested to contact the undersigned by telephone for the purpose of resolving any such issue and thereby facilitating prompt approval of this application.

Respectfully submitted,

Roberts Mlotkowski Safran & Cole, P.C.
